

100NEO

The smallest, fastest, best quality
ID card printer in its class.

100NEO

Designed from the ground up to be best in class: the powerful 100NEO packs a mighty punch. With a focus on high speed, the highest quality and with the environment a key factor in every aspect of its design and manufacture, the 100NEO has been developed to exceed the expectations of today's tech-savvy and connected consumer.

Bundled "Magicard PrintanID" software enables users to easily produce pin-sharp cards every time, while the power of Magicard's Clix user interface lets users, wherever they are, operate the 100NEO over company intranets.

Small footprint – Small but mighty, the 100NEO proves that the best things come in small packages. With its small footprint and light weight, the 100NEO will fit into offices large or small while also being ideal for the home worker.

High speed – Quick to set up, quick to operate and quick to deliver the best results. The 100NEO offers the highest print speed in Magicard's smallest printer package available today.

Quality – The 100NEO packs a mighty punch delivering HD photo quality printing out of the box. Delivering photo-realistic colour reproduction, and with top-quality edge-to-edge printing guaranteed, your printed cards will never look so good.

 50 Card input hopper	 Remote management	 Digital shredding	
 Limited warranty	 Edge to edge	 DTC Photo quality printing	
 Small footprint	 Ethernet	 Threat benchmarked	

Remote management & control

The 100NEO uses the latest version of Magicard's Clix remote user interface, giving users remote control of the device to manage all aspects of printer set-up, maintenance, diagnostics and operation.

The simplest 'plug and play' set on the market combined with easy control of device settings, it helps with the management of supplies and enables proactive ordering mechanisms to be established.

Clix allows for remote monitoring of activity and the status of the printer and its consumables from any web-enabled device on the same network.

Warranty

The 100NEO comes with a 2 year MagiCover NEO Limited Warranty.

Software

Magicard's easy to use badging software for the Magicard NEO range worldwide.

Commitment to the environment

Whether through carbon offset or actively seeking to reduce the individual footprint of devices, Magicard's approach is driven by recognition of the importance of environmental issues to consumers worldwide.

The 100NEO marks the start of Magicard's move towards devices which have a high level of designed-in recyclability. All future devices will be built with this in mind.

The 100NEO is manufactured and packaged from over 75% recycled or recyclable material.

Magicard's support of One Tree Planted sees the company plant a tree for every printer sold.

Since entering the scheme, Magicard has planted 30,000 trees resulting in a potential CO² offset of 660 tonnes p.a. This equates to the annual mileage of 150 cars or every journey undertaken by Magicard's global workforce for both personal and professional purposes and a significant proportion of our ground transportation for products worldwide.

Security built in

Digital shredding™ - The 100NEO is equipped with Magicard's 'Digital Shredding' function which renders data sent to the printer unreadable after use – contributing to users' data security and enhancing compliance with GDPR.

Threat benchmarking - scans are run against the comprehensive vulnerability assessment tool, Nessus Pro and push regular updates to the device, ensuring that the printer software and associated system configuration conform to the highest levels of security.

Anti-fraud - The 100NEO comes with 3 standard HoloKote® designs, Magicard's patented HoloKote® security watermark which can be printed across the card surface. When used with HoloPatch® cards, one area of the HoloKote® watermark can be highlighted as a high visibility security seal.

100NEO

Printer specifications

Print mode

Colour dye sublimation, monochrome thermal printing and rewritable technology.

Print speed - single-sided

Photo Quality Colour: 23 seconds per card / 157 cards per hour
High Speed Quality Colour: 18 seconds per card / 200 cards per hour
Monochrome: 4.7 seconds per card / 766 cards per hour
